

Felt Starfish Tutorial -

In Autumn Tones

by Woolhalla

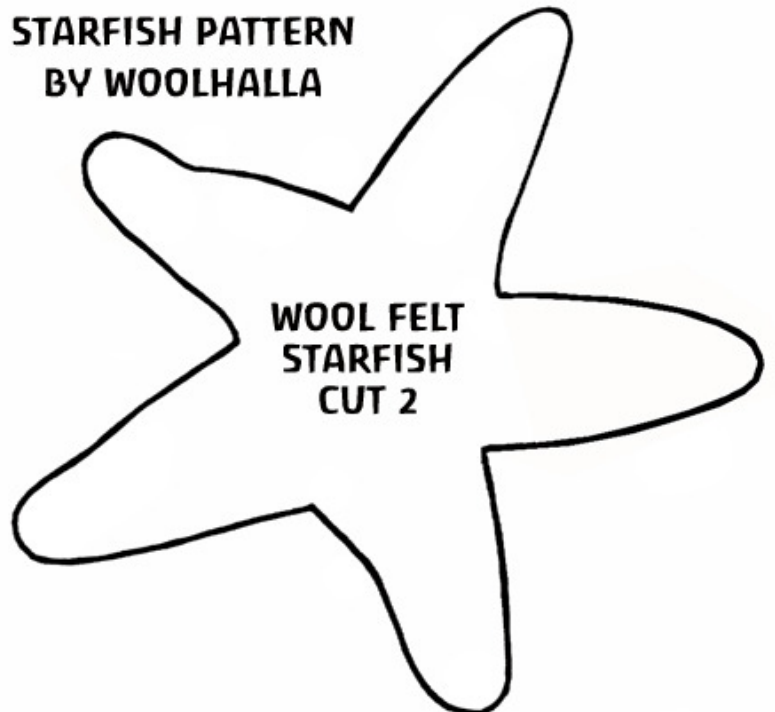

Starfish on the West Coast of Canada are often found in beautiful oranges and purples. Inspired by a photo I had posted (below), I just *had to* make some starfish out of autumn & orangey wool felt tones.

Then I popped up a tutorial on my blog. Here is the handy PDF version for you to print off so you can make some felt starfish too!

Instructions: Cut out 2 pieces of the pattern in wool felt without a seam allowance (the full size pattern is on the right). Blanket stitch around and fill with a small amount of wool stuffing.

I have made my starfish with matching felt in orangey autumn tones, but of course starfish come in many other colours. They could be embellished too... fancy stitches, sequins, whatever you can dream up. I have left my starfish simple on purpose :)
